VETINOX
EQUIPEMENT VETERINAIRE

VETINOX
EQUIPEMENT VETERINAIRE

Designed for Excellence in Veterinary Care

Veterinary professionals demand equipment that delivers reliability, precision and ergonomic performance — every day, in every clinical environment.

As France's leading manufacturer of veterinary equipment, VETINOX designs and manufactures both standard and bespoke solutions using premium-grade 304L stainless steel.

Engineered for demanding clinical environments, **VETINOX** equipment combines exceptional durability, outstanding hygiene and long-term reliability, providing veterinary professionals with robust, dependable solutions designed to perform throughout their working life.

NEW OPTIMA RANGE

NEW OPTIMA RANGE – ECO-OPTIMISED DESIGN

Professional performance. Smarter logistics. Responsible design.

With the OPTIMA range, VETINOX has redefined essential veterinary equipment to deliver the ideal balance of professional performance, practical efficiency and responsible design.

Each product combines the durability and hygiene of premium stainless steel construction with a transport- and storage-conscious design. Supplied in a compact individual cardboard carton as a series of pre-engineered components, OPTIMA products are designed for straightforward final assembly using the supplied Allen key.

This considered approach helps optimise transport and storage while reducing packaging volume and environmental impact — without compromising the robustness, reliability or premium finish expected from VETINOX.

- Professional-grade construction: Premium stainless steel engineered for durability, hygiene and intensive clinical use.
- Efficient logistics: Compact packaging designed to optimise transport and storage.
- Straightforward assembly: Pre-engineered components and supplied tools enable quick and easy final assembly.
- Responsible design: A considered approach to packaging and logistics helps reduce environmental impact.

Flat-top Examination Table

OP300.000

The redesigned version of the TA300000 retains its proven stability while benefiting from an optimised logistics-focused design:

- Flat work surface in 304L stainless steel (600 mm × 1250 mm)
- Also available with castors: model OP300001
- Reinforced frame with crossbar (height: 910 mm)
- Stability pads for secure positioning

A robust and functional examination table designed to facilitate patient restraint and handling during everyday veterinary practice.

Mayo Table tripod base

OP600.008

Mobile, stable, and practical, the Mayo Table supports veterinary professionals throughout their daily activities:

- Secure mechanical assembly
- Adjustable working height (750 mm - 1250 mm)
- Tray with safety edges (620 mm x 415 mm)
- Tripod base ensuring excellent stability
- Swivel castors for smooth manoeuvrability

An essential mobile workstation designed for treatment rooms. Thanks to its tripod base, it moves effortlessly even in confined spaces.

Height-adjustable Bridge Table

OP110.100

The Bridge Table creates an additional working surface above the surgical area:

- Tray with safety edges (825 mm x 495 mm)
- Adjustable height for precise positioning above the surgical table (960 mm - 1580 mm)
- Locking castors for maximum stability
- Fast and easy assembly using the supplied tools

A versatile solution that improves organisation and efficiency in the operating room.

STRETCHER TABLES

TA100 – Stretcher with Stainless Steel Frame • Model TA100.100 & TA100.200

The Perfect Balance of Strength, Comfort & Mobility

Designed to meet the demands of busy veterinary practices, the VETINOX stretcher table combines robust construction with effortless manoeuvrability. Providing a safe and comfortable solution for patient handling and transportation, it enables smooth transfers from admission through to the treatment and recovery areas.

Robust & Durable: Manufactured from high-quality stainless steel and premium materials, the stretcher table is engineered to withstand the rigours of intensive daily clinical use.

Comfort & Manoeuvrability: Designed to facilitate the safe and effortless transfer of heavy, injured or weakened patients. Retractable handles allow the table to be quickly converted into a practical stretcher when required.

Practical & Hygienic: Easy-to-clean surfaces support efficient cleaning and disinfection between patients. Choose from an ultra-hygienic stainless steel tabletop or a comfortable PVC mat to suit your clinical requirements.

Customisable: The PVC mat is available in a choice of six colours, allowing you to complement your clinic's interior and create a coordinated clinical environment.

Product Code	Description
TA100.100	Stretcher with stainless-steel table top - (L 1250 x W 600 mm - H 910 mm)
TA100.200	Stretcher PVC top with stainless-steel frame (6 colours to choose from) - (L 1250 x W 600 mm - H 910 mm)

VETINOX EQUIPEMENT VETERINAIRE

TA100 – ELITE Electric Table

A versatile 2-in-1 solution for examination and patient transport

Designed to combine clinical versatility with exceptional ergonomics, the ELITE Stretcher Table provides a practical solution for both patient examination and transport. Its whisper-quiet stainless-steel structure lowers to just 225 mm from floor level, allowing patients to step onto the table independently and significantly reducing the need for manual lifting.

Simple, precise operation is provided via a convenient wired hand control, while the choice of hygienic stainless-steel or radiography-compatible tabletop allows the table to be tailored to a wide range of clinical applications.

- **2-in-1 versatility:** Combines a fully functional examination table with a practical patient transport solution.
- **Low-access design:** Lowers to just 225 mm from floor level, making it easier for patients to step onto the table without lifting.
- **Enhanced ergonomics:** Designed to reduce manual handling and help minimise the risk of musculoskeletal disorders (MSDs), supporting safer working practices and protecting the veterinary team.
- **Whisper-quiet operation:** Smooth, discreet electric adjustment creates a calm environment for both patients and clinical staff.
- **Flexible tabletop options:** Available with a highly hygienic stainless-steel surface or a radiography-compatible tabletop for greater diagnostic versatility.
- **Intuitive control:** Wired hand control provides straightforward and precise positioning throughout examination and treatment.

Product Code	Description
TA100.400	ELITE lift exam stretcher with battery (indoor & outdoor use)
TA100.405	ELITE lift exam stretcher with remote and battery (indoor & outdoor use)
TA100.420	ELITE lift exam stretcher with battery (indoor use)
TA100.425	ELITE lift exam stretcher with remote and battery (indoor use)

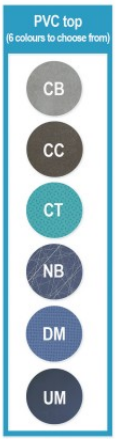

EXAMINATION TABLES

VETINOX EQUIPEMENT VETERINAIRE

Electric Stainless Steel Flat Top Examination Table • Model TA301.000

Ergonomic performance. Exceptional stability. Built for veterinary practice.

Designed for demanding veterinary environments, this premium electric consultation table combines high-grade 304L stainless steel construction with smooth, precise height adjustment and exceptional stability.

The electrically adjustable working height allows the table to be positioned comfortably for a wide range of clinical procedures, helping veterinary professionals maintain a more ergonomic working posture while reducing unnecessary bending and lifting.

A robust cross-frame construction provides excellent stability throughout the full height range, while the quiet, jolt-free electric actuator ensures smooth and controlled movement. With a lifting capacity of up to 100 kg, the table is suitable for the examination of a wide range of companion animals.

The table features a durable, easy-clean veterinary-grade mat and stainless steel frame, with the frame and mat available in a selection of finishes to complement the clinical environment.

Key Features

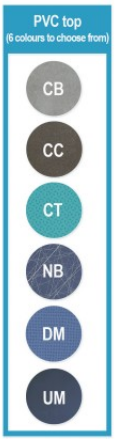

- Premium 304L stainless steel construction – hygienic, durable and designed for long-term use in veterinary environments
- Electric height adjustment from 370 to 1000 mm
- Foot-operated controls for convenient, hands-free height adjustment
- Quiet, smooth and jolt-free electric actuator for controlled positioning
- High stability cross-frame design for confident handling during examination
- Load capacity up to 100 kg
- 1250 × 600 mm working surface providing generous examination space
- Durable, easy-clean veterinary mat in light mottled grey
- Integrated attachment hooks for securing accessories and equipment
- Stability skids for a secure working platform
- CE-compliant electrical system
- Available in standard and made-to-measure formats
- 5-year warranty on the stainless steel structure
- 2-year warranty on the electrical system

Product Code	Description
TA301.000	Electric Stainless Steel Examination Table and Frame
TA301.010-CB	Electric Stainless Steel Examination Table and PVC Top (light grey)

TA301.010-UM	Electric Stainless Steel Examination Table and PVC Top (dark blue)

Electric Consultation Table With Scale • Model TA301.100

Precision engineering. Effortless adjustment. Built for veterinary practice.

Combining premium 304L stainless steel construction with intelligent electric height adjustment, this consultation table is designed to deliver exceptional durability, hygiene and ease of use in the modern veterinary environment.

The generous 370–1,000 mm height range allows the table to be positioned precisely for each examination, helping veterinary professionals maintain a comfortable working position and reduce unnecessary bending and lifting. Convenient foot-operated controls provide hands-free height adjustment, leaving both hands available to safely manage the patient.

A robust cross-frame lifting mechanism and stability skids provide outstanding rigidity and stability, while the quiet, smooth and virtually jolt-free electric actuator ensures gentle positioning of the patient. With a 100 kg maximum load capacity, the table is suitable for a wide range of veterinary examinations.

Integrated weighing. Seamless workflow.

The consultation surface incorporates an integrated automatic weighing system, providing accurate weight readings to within 100 g without the need to move the patient to separate weighing equipment. A large LCD display provides clear, easy-to-read results at a glance.

Manufactured entirely from high-grade 304L stainless steel, the table offers the exceptional corrosion resistance, cleanability and longevity expected from professional veterinary equipment.

Key Features

- Electric height adjustment: 370–1,000 mm
- Dimensions: 1250 x 600mm
- Foot-operated controls for convenient hands-free operation
- Integrated weighing system accurate to 100 g
- 100 kg maximum load capacity
- Quiet, smooth and jolt-free electric operation
- Robust cross-frame construction for excellent stability
- Stability skids for added security
- Large, easy-to-read LCD display
- Durable mottled grey carpeted examination surface
- Practical attachment hooks
- Manufactured from 304L stainless steel
- Available in a range of standard formats and made-to-measure options
- CE-compliant electrical system

VETINOX EQUIPEMENT VETERINAIRE

Elite Electric Examination Table • Model TA400.000

Exceptional stability. Effortless handling. Designed around the veterinary professional.

The ELITE Electric Veterinary Consultation Table combines sophisticated design, exceptional stability and effortless height adjustment to create a premium examination and lifting solution for modern veterinary practices.

Engineered entirely from high-grade 304L stainless steel, the ELITE delivers the hygiene, durability and reliability expected in a professional clinical environment. Its innovative low-profile design lowers the tabletop to just 260 mm, providing an exceptionally low loading height that makes positioning larger or less mobile patients significantly easier — while helping to reduce physical strain on the veterinary team.

With a smooth, quiet electric height adjustment system operated by a convenient foot control, the table can be raised from 260 mm to 990 mm, providing an ergonomic working height for examination, treatment and handling.

With a maximum load capacity of 100 kg, the ELITE performs equally well as a consultation table or lifting table, offering genuine versatility within the veterinary environment.

Key Features

- 2-in-1 functionality – combines a professional consultation table with a lifting table
- Ultra-low loading height of 260 mm – designed to make patient loading easier and safer
- Electric height adjustment from 260 to 990 mm
- Convenient foot-operated controls for hands-free height adjustment
- Smooth and quiet electric actuator for controlled, effortless movement
- 1250 × 600 mm stainless steel tabletop providing a generous working surface
- Maximum load capacity of 100 kg
- Robust cross-frame mechanism provides exceptional stability throughout the height range
- Manufactured entirely from 304L stainless steel for outstanding hygiene, durability and longevity
- Available with a flat stainless steel top or an upholstered top with retaining frame
- Upholstered top available in blue, green, light grey or dark grey
- Custom configurations available to suit individual clinical requirements

Elite Electric Examination Table • Model TA400.000

Designed for Modern Veterinary Practice

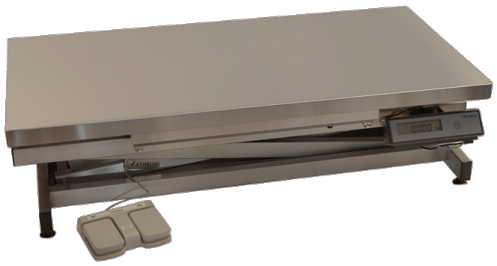

The ELITE has been developed with both patient welfare and clinician ergonomics in mind. Its exceptionally low loading height can simplify the handling of larger, older or mobility-impaired animals, while the powered height adjustment allows the working position to be tailored to the task.
The result is a highly versatile examination platform that supports comfortable patient handling, efficient clinical workflows and reduced physical strain — all within a robust, easy-to-clean stainless steel construction.

VETINOX EQUIPEMENT VETERINAIRE

Elite Electric Examination Table with Scale• Model TA400.100

Precision weighing. Effortless handling. Exceptional performance.

The ELITE Electric Veterinary Consultation & Weighing Table combines three essential functions in one sophisticated clinical platform — consultation, lifting and weighing.

Designed for demanding veterinary environments, the ELITE features a robust 304L stainless steel construction with a sleek, low-profile design that provides a lowered working height of just 330 mm. This makes loading and positioning patients considerably easier, helping to minimise physical strain when handling larger or less mobile animals.

The smooth, quiet electric height adjustment, operated via a convenient foot control, raises the table from 330 mm to 1020 mm, allowing the working height to be tailored to the procedure and the clinician.

Integrated directly into the stainless steel tabletop, the automatic weighing system provides weight measurements to an accuracy of 100 g. This enables weight to be captured quickly and conveniently during the consultation or examination, without the need for a separate set of veterinary scales.

With a maximum capacity of 100 kg, the ELITE provides a versatile solution for routine consultations, patient handling and accurate clinical weighing.

Key Features

- Integrated automatic weighing system with 100 g accuracy
- Ultra-low loading height of 330 mm for easier patient access
- Electric height adjustment from 330 to 1020 mm
- Foot-operated controls for convenient, hands-free adjustment
- Quiet and smooth electric actuator
- 1250 × 600 mm stainless steel tabletop
- Maximum load capacity of 100 kg
- Robust cross-frame mechanism for outstanding stability
- Manufactured entirely from 304L stainless steel
- Available with a flat stainless steel top or upholstered top with retaining frame
- Upholstered top available in blue, green, light grey and dark grey
- Made-to-measure configurations available
- Designed for long-term use in demanding veterinary environments

Elite Electric Examination Table with Scale• Model TA400.100

Designed Around the Patient. Engineered Around the Clinician.

The ELITE combines practical patient handling with clinical precision. Its low loading height helps simplify patient access, while powered height adjustment provides an ergonomic working position throughout the consultation.
The integrated weighing system further streamlines the clinical workflow, allowing accurate patient weights to be obtained without moving the animal between the examination table and separate scales.
Constructed from durable 304L stainless steel, the ELITE offers the hygiene, strength and longevity expected from premium veterinary equipment.

Electric Examination X-Base Table • Model TA600.000

Premium stainless steel consultation table designed for ergonomic veterinary examinations

Combining robust construction with effortless height adjustment, this electric consultation table is designed to provide a comfortable and efficient working environment for veterinary professionals.

Manufactured from high-quality 304L stainless steel, the table offers excellent durability, corrosion resistance and hygienic performance — making it ideally suited to the demanding requirements of modern veterinary practice.

The electric central column provides smooth, quiet and precise height adjustment from 680 to 1080 mm, operated conveniently via a foot control. This allows the working height to be tailored to each consultation, helping practitioners maintain a comfortable and ergonomic position whether standing or seated.

Designed for Stability and Ease of Use

The robust central-column design provides excellent stability throughout the height range, while the smooth, jerk-free movement ensures controlled positioning of the patient.

For added flexibility, the table is fitted with lockable castors, allowing it to be moved easily around the consulting room before being securely positioned using the individual wheel brakes.

Suitable for the examination and treatment of animals weighing up to 80 kg, this versatile table is an excellent choice for veterinary consulting rooms, treatment areas and general examination spaces.

Key Features

- 304L stainless steel construction for outstanding hygiene, durability and corrosion resistance
- Electric height adjustment from 680–1080 mm
- Convenient foot-operated control
- Smooth, quiet and controlled height adjustment
- 1250 × 600 mm flat stainless steel tabletop
- Practical mat and retaining frame for secure patient positioning
- Stable X-shaped central base provides excellent support while allowing close access to the patient
- Lockable castors for easy manoeuvrability and secure positioning
- Suitable for animals weighing up to 80 kg
- Ideal for veterinary consultations, examinations and routine treatment

VETINOX EQUIPEMENT VETERINAIRE Electric Examination X-Base Table • Model TA600.000

Ergonomic by Design

The central-column configuration allows the veterinary professional to work comfortably close to the patient, including when seated. The generous height adjustment range helps create a more ergonomic working position for different procedures, practitioners and patient sizes.

A practical combination of premium stainless steel construction, electric height adjustment and excellent mobility, this table is designed to deliver dependable performance throughout everyday veterinary practice.

Product Code	Description
TA600.000	Examination X-Base Table, Blue PVC top and electric column
TA600.010	Examination X-Base Table, Blue PVC top, 4 wheels with locks and electric column
TA600.100	Examination X-Base Table, Stainless Steel top and electric column
TA600.110	Examination X-Base Table, Stainless Steel top with locks and electric column

TUB TABLES

VETINOX EQUIPEMENT VETERINAIRE

Hydro & Dentistry Cabinets • Model TA170.540 & TA170.550

Model TA170.540

Model TA170.550

Professional preparation. Exceptional hygiene. Thoughtful design.

Designed for the demands of modern veterinary practice, the TA170.540 & TA170.550 Preparation Tables combines durable stainless steel with a contemporary, water-resistant cabinet to create a versatile workstation for wet preparation, grooming, dentistry and general clinical procedures.

Its clean, architectural design brings a premium finish to the treatment environment, while the robust construction provides the durability and hygiene expected in a professional veterinary setting.

Designed around the way you work

The integrated stainless steel hydro basin provides a practical solution for procedures involving water, rinsing and wet preparation, while the 400 mm recessed knee space allows the clinician to work comfortably from a seated position.

The generous working area provides excellent access around the patient, while the raised tray helps contain water and debris during preparation.

Intelligent, adaptable working surface

The table incorporates a perforated stainless steel tray, providing secure support for smaller patients while allowing water and fluids to drain efficiently.

For applications where enhanced drainage is required, a slatted tray option is also available, making the workstation adaptable to different preparation and grooming requirements.

Integrated storage

Practical storage is built directly into the workstation, keeping essential equipment close at hand without compromising the clean appearance of the clinical environment.

The cabinet incorporates:

- Three full-depth drawers for instruments and consumables
- One full-height storage cupboard (Model TA170.550) or Two full-height storage cupboards (model TA170.540)
- Durable drawer runners tested to 100,000 operating cycles
- Water-resistant silky-white melamine finish

Hydro & Dentistry Cabinets • Model TA170.540 & TA170.550

Built for veterinary environments

The combination of stainless steel and water-resistant materials provides a robust, hygienic and easy-to-maintain workstation designed for everyday clinical use.

Every element has been considered to balance clinical practicality, operator comfort and long-term durability.

KEY FEATURES

- Premium stainless steel hydro basin and working area
- Water-resistant silky-white cabinet finish
- Perforated stainless steel preparation tray
- Optional slatted tray for enhanced drainage applications
- Generous 400 mm ergonomic knee recess
- Integrated storage with 3 drawers and 1 cupboard
- Drawer runners tested to 100,000 cycles
- Ideal for wet preparation, grooming, dentistry and clinical procedures
- Contemporary design suited to modern veterinary environments

VETINOX EQUIPEMENT VETERINAIRE

TA170 – Stainless Steel essentials

Ergonomic Performance. Built Around Your Practice.

Designed as a versatile centrepiece for the modern treatment area, the VETINOX TA170 Tub Table combines exceptional durability, clinical hygiene and ergonomic functionality in one highly adaptable workstation.

Manufactured from premium-grade stainless steel, the TA170 is engineered to withstand the demands of everyday veterinary practice while providing a hygienic, easy-to-clean working environment.

Its modular design allows the table to be configured around the individual requirements of your practice. Select from a range of worktop, base and storage options to create a workstation that complements your workflow and working environment.

From routine preparation and treatment to more demanding clinical applications, the TA170 delivers the strength, flexibility and professional finish expected from premium veterinary equipment.

- Choice of worktops: available with either a removable slatted top or a perforated top to suit your preferred treatment and cleaning procedures.
- Choice of modular structures: choose between a simple leg-mounted frame, an ergonomic kick-space base, or a fully enclosed cabinet to match your workspace requirements.
- Storage within easy reach: customisable configurations with various combinations of doors and drawers to optimise treatment area organisation.
- 100% stainless steel construction: premium-quality material offering outstanding durability, optimal hygiene and easy cleaning.

Storage Solution: Perfect integration of cabinets (doors or drawers) to keep all your equipment within easy reach and protected from dust.

SURGICAL TABLES

TA300 – Surgical table with 1 diamond-shaped V-shaped drain tray

TA300.210

TA300.200

Precision, Hygiene & Practical Performance

Designed for veterinary practices requiring a dependable, hygienic work surface for examinations, procedures and occasional surgery, the VETINOX TA300 Surgical Table combines robust stainless steel construction with thoughtful clinical functionality.

Its distinctive diamond-shaped V-top positions the patient securely while allowing the veterinary professional to work comfortably close to the animal. The integrated central drain provides efficient fluid management, helping maintain a clean and hygienic working environment throughout procedures.

Available with either fixed legs or a mobile four-castor configuration, the TA300 can be specified to suit the requirements of the clinical environment.

KEY FEATURES

Diamond-Shaped V-Top

The gently formed V-shaped stainless steel tabletop incorporates a central drain outlet, promoting efficient and controlled drainage of fluids while providing a practical working surface for examinations and procedures.

Premium Stainless Steel Construction

Manufactured entirely from high-quality stainless steel, the TA300 offers excellent durability, corrosion resistance and long-term reliability. Its smooth, non-porous surfaces are quick and easy to clean and disinfect, supporting high standards of clinical hygiene.

Integrated Restraint Bars

Discreetly positioned beneath the tabletop, the integrated side restraint bars provide convenient attachment points for securing and stabilising the patient when required.

Fixed or Mobile Configuration

Choose between a stable four-leg configuration with adjustable levelling feet or a mobile version fitted with four castors, including two with locking mechanisms. This allows the table to be configured for either maximum stability or greater flexibility within the clinical environment.

TA301.210

Precision. Stability. Hygiene.

Designed for modern veterinary operating and treatment environments, the TA301 Electric Surgical Table combines ergonomic positioning, exceptional stability and hygienic stainless steel construction in a compact, highly versatile design.

Ideal for clinics where space is at a premium, the TA301 provides smooth, precise electric height adjustment for procedures involving animals weighing up to 80 kg. Its robust scissor-lift mechanism and quiet electric actuator deliver controlled, virtually vibration-free movement, allowing the table to be positioned effortlessly at the optimum working height.

The TA301 is equally suited to surgical procedures and routine examinations, making it a practical, space-efficient addition to the veterinary treatment room.

DESIGNED FOR HYGIENIC CLINICAL WORK

The durable stainless steel construction provides a robust, easy-to-clean working surface designed to withstand the demands of everyday veterinary use. The gently curved surgical top incorporates an integrated drain outlet, allowing fluids to be efficiently channelled away from the patient and simplifying cleaning between procedures.

STABILITY & SAFETY

The ultra-stable scissor-lift structure provides secure support throughout patient handling and positioning. Floor-fixing feet ensure a firm, stable working platform, while 10 integrated tie-down hooks — five on each side — provide convenient attachment points for securing patients safely during procedures.

EFFORTLESS ELECTRIC HEIGHT ADJUSTMENT

A practical foot-operated electric control allows the working height to be adjusted quickly and precisely, helping veterinary teams maintain a comfortable and ergonomic working position.

Height adjustment: 370–940 mm
Maximum patient weight: 80 kg

VETINOX EQUIPEMENT VETERINAIRE

TA300 – Surgical table with 1 diamond-shaped V-shaped drain tray

VERSATILITY BUILT IN

For additional clinical flexibility, the TA301 can be specified with four lockable castors, allowing the table to be repositioned when required while maintaining stability during use.
A double I.V. holder is also available as an optional accessory, providing convenient support for intravenous fluid administration during procedures.

TA600.200

TA600.300

TA600.360

Precision positioning. Effortless ergonomics. Built for demanding clinical environments.

Designed to provide exceptional versatility, stability and ergonomic performance, our range of electric central-column surgical tables combines robust stainless-steel construction with a precision-engineered anodised aluminium central column.

The electric height adjustment, operated by a convenient foot control, allows the working height to be adjusted smoothly and instantly. This enables the veterinary professional to maintain a comfortable, ergonomic working position throughout every procedure, helping to reduce unnecessary strain and improve ease of access to the patient.

Exceptional Positioning Flexibility

Every table in the range incorporates a manual Trendelenburg and Reverse Trendelenburg positioning system, providing precise and intuitive adjustment of the tabletop to suit the requirements of each procedure.

Whether positioning for surgery, preparation or examination, the system allows the patient to be positioned accurately and securely, giving the veterinary team greater flexibility throughout the clinical workflow.

CHOOSE THE CONFIGURATION TO SUIT YOUR PRACTICE

The range can be configured with a choice of tabletop, base and mobility options, allowing each table to be tailored to the demands of the operating environment.

1. CHOICE OF TABLETOP

Surgical Top – Dual Drainage

An ergonomic, stainless-steel working surface designed for efficient fluid management. The tabletop channels fluids towards two integrated drain outlets, positioned at either side of the working surface for practical and effective drainage.

V-Shaped Top – Maximum Positioning Versatility

The V-shaped tabletop comprises two independently hinged panels, each offering adjustable positioning of up to 90°. A central drain outlet provides efficient fluid management, while the fully removable central section allows easy access for thorough cleaning and enhanced versatility between procedures.

VETINOX EQUIPEMENT VETERINAIRE

TA600 – Manual Trendelenburg setting

2. CHOICE OF BASE & MOBILITY

Fixed Base
Ideal for permanent installation, the fixed-base configuration incorporates adjustable levelling feet to provide exceptional stability, rigidity and secure positioning on the floor.

X-Frame Base – Fixed or Mobile
The X-frame configuration is designed to maximise access to the patient, allowing the practitioner to work comfortably in a seated position with improved legroom and closer proximity to the tabletop.

Available in both fixed and mobile configurations, the X-frame base provides the flexibility to suit different clinical environments and working preferences.

CONFIGURED FOR THE WAY YOU WORK

From precision surgical positioning to everyday clinical preparation, the range offers a flexible combination of ergonomic electric height adjustment, precise patient positioning, efficient drainage and robust stainless-steel construction.

Choose the tabletop and base configuration that best matches your clinical requirements and create a surgical table designed around the way your practice works.

TA600 ELITE – Electrical Trendelenburg setting

TA600.400

TA600.280

Advanced Electric Surgical Tables

Designed for the demands of modern veterinary surgery, the TA600 ELITE range combines exceptional strength and stability with fully electric positioning for effortless patient handling and precise surgical control.

In addition to electric height adjustment, both Trendelenburg and Reverse Trendelenburg positioning are powered by an electric actuator, allowing the patient to be positioned smoothly and accurately at the touch of a foot control.

The result is precise, controlled positioning throughout the procedure, while helping to promote a more ergonomic working posture and reduce physical strain on the veterinary team.

Choice of Tabletop

V-Shaped Surgical Top
A practical, ergonomically designed tabletop featuring manually adjustable side panels for precise patient positioning. The central drainage channel provides efficient fluid management, helping to maintain a clean and controlled surgical working environment.

Flat Surgical Top with Dual Drainage
A robust, stable and versatile working surface incorporating two integrated drainage outlets. Designed for effective fluid management, it helps maintain a clean surgical field throughout a wide range of procedures.

Choice of Base & Mobility

Fixed Base
A robust, streamlined base designed to provide excellent stability while maintaining a compact footprint — ideal where efficient use of clinical space is essential.

X-Frame Base – Fixed or Mobile
A strong and stable X-frame configuration available as either a fixed or mobile solution. The mobile version is fitted with four castors, each incorporating a locking mechanism for secure positioning during procedures.

VETINOX EQUIPEMENT VETERINAIRE

TA700 Electric Surgery Table

TA700.001

TA700.015

Advanced ergonomics. Precision positioning. Effortless control.

Designed for the demands of modern veterinary surgery, the TA700 Surgical Table combines refined ergonomics, precise patient positioning and fully electric operation in one exceptionally versatile platform.

Its whisper-quiet, ergonomically engineered base creates a calm and efficient working environment, while smooth, progressive movements allow the patient to be positioned with exceptional accuracy. By reducing the physical effort required for height and positioning adjustments, the TA700 helps minimise practitioner strain and supports a more comfortable working posture throughout every procedure.

Fully Electric Precision
Independent foot controls provide intuitive, precise adjustment of both table height and Trendelenburg / Reverse Trendelenburg positioning. Smooth electric actuation ensures controlled, progressive movement without sudden jolts, enhancing patient comfort while providing the veterinary team with safe, unrestricted access to the surgical field.

Three Surgical Top Configurations
To accommodate different surgical techniques and clinical preferences, the TA700 is available with three stainless steel tabletop configurations:

- **Flat Top** – a versatile, easy-clean surface suitable for a wide range of procedures.
- **Surgical Top with Single Drain** – designed for efficient fluid management during surgical procedures.
- **Curved Top with Dual Drains** – combines patient positioning support with enhanced fluid drainage.

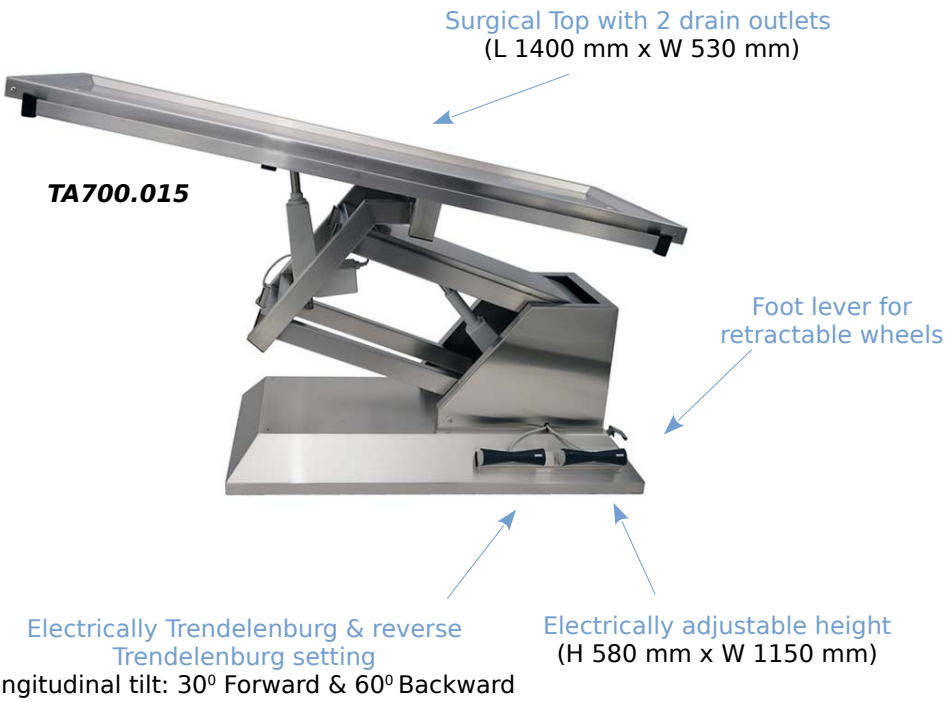

All configurations incorporate two integrated side restraint bars, providing secure and flexible patient positioning.

TA700 Electric Surgery Table

Effortless Mobility

A high-performance retractable wheel system provides effortless transition between stationary and mobile operation. A simple foot lever deploys or retracts the four fully integrated wheels, allowing the table to be repositioned quickly when required and securely stabilised for surgery.

The TA700 brings together precision engineering, ergonomic performance and clinical versatility to create a surgical table designed around the needs of both the veterinary professional and the patient.

Product Code	Description
TA700.000	Flat-top surgical table (electric Trendelenburg – reverse Trendelenburg setting) (L 1400 x W 530 mm)
TA700.001	Surgical table with one drain outlet (electric Trendelenburg – reverse Trendelenburg setting) (L 1400 x W 530 mm)
TA700.005	Surgical table with two drain outlet (electric Trendelenburg – reverse Trendelenburg setting) (L 1400 x W 530 mm)
TA700.010	Flat-top surgical table with 4 retractable wheels (electric Trendelenburg – reverse Trendelenburg setting) (L 1400 x W 530 mm)
TA700.011	Surgical table with one drain outlet with 4 retractable wheels (electric Trendelenburg – reverse Trendelenburg setting) (L 1400 x W 530 mm)
TA700.015	Surgical table with two drain outlets with 4 retractable wheels (electric Trendelenburg – reverse Trendelenburg setting) (L 1400 x W 530 mm)

VETINOX EQUIPEMENT VETERINAIRE

TA700 Electric – lateral tilt

TA700115

Advanced three-dimensional positioning for uncompromised surgical access

Experience exceptional positioning freedom with the TA700 Surgical Table with Lateral Tilt — a premium solution engineered for advanced veterinary surgery. Combining French engineering expertise with innovative fully electric technology, the TA700 delivers precise, effortless patient positioning while supporting a more ergonomic working environment for the veterinary team.

Its whisper-quiet electric base enables smooth, controlled adjustment in every direction, significantly reducing the need for manual handling. Alongside powered height adjustment and longitudinal Trendelenburg and Reverse Trendelenburg positioning, the innovative lateral tilt function provides precise side-to-side adjustment of the tabletop.

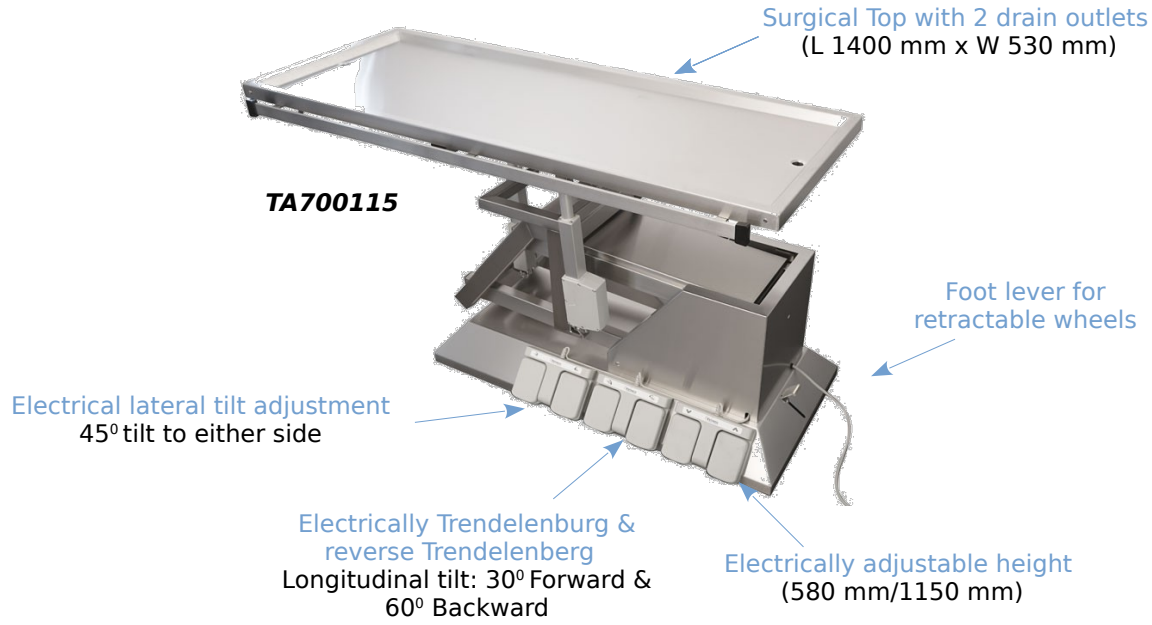

This advanced three-dimensional positioning capability allows the patient to be optimally aligned for each procedure, providing enhanced access to the surgical field while helping to reduce physical strain and the risk of musculoskeletal disorders for practitioners.

Three-dimensional electric positioning
- Electric height adjustment
- Electric Trendelenburg and reverse Trendelenburg positioning
- Electric lateral tilt adjustment

Designed for surgical versatility and imaging
The stainless steel tabletop is available in three configurations to suit a wide range of procedures:
- Flat surgical top
- Surgical top with single drain outlet
- Surgical top with two drain outlets

Enhanced patient security and mobility
A dual restraint system combines side restraint bars with integrated tie-down hooks, providing secure and flexible patient positioning throughout the procedure. Four retractable castors allow the table to be moved smoothly and effortlessly when required, while maintaining a stable working platform during surgery.

TA700 Electric – lateral tilt

Product Code	Description
TA700.100	Flat-top surgical table (electric Trendelenburg – reverse Trendelenburg setting) lateral tilt (L 1400 x W 530 mm)

TA700.105	Surgical table with two drain outlets (electric Trendelenburg - anti-Trendelenburg setting) lateral tilt (L 1400 x l 530 mm)
TA700.110	Flat-top surgical table with 4 retractable wheels (electric Trendelenburg – reverse Trendelenburg setting) lateral tilt (L 1400 x W 530 mm)
TA700.111	Surgical table with one drain outlet with 4 retractable wheels (electric Trendelenburg - anti-Trendelenburg setting) lateral tilt (L 1400 x W 530 mm)
TA700.115	Surgical table with two drain outlets with 4 retractable wheels (electric Trendelenburg - anti-Trendelenburg setting) lateral tilt (L 1400 x W 530 mm)

VETINOX EQUIPEMENT VETERINAIRE

TA701 Electric – Heated top

TA701015

Advanced thermal management and effortless electric positioning for precision veterinary surgery.

The TA701 Electric Heated Surgical Table combines advanced patient temperature management with fully electric positioning, providing a premium solution for demanding veterinary surgical environments. Designed to support patient comfort throughout every procedure, the TA701 features an ultra-quiet 304L stainless steel construction, creating a calm, hygienic and professional operating environment.

Fully electric height and Trendelenburg positioning are controlled effortlessly via dedicated foot pedals, allowing practitioners to achieve precise patient positioning while maintaining an ergonomic working posture.

At the heart of the TA701 is its integrated heated tabletop and intelligent thermal regulation system. A high-precision temperature probe continuously monitors the patient's temperature, with the system automatically regulating the heated surface to help maintain a stable and appropriate thermal environment throughout surgery.

Key Features

- **Intelligent thermal regulation**
  Integrated heated tabletop with high-precision temperature probe for continuous monitoring and control. An intuitive LCD display provides real-time temperature information, with adjustment up to 35°C.
- **Fully electric positioning**
  Independent foot controls provide smooth, precise and virtually silent adjustment of table height and longitudinal tilt, including Trendelenburg and Reverse Trendelenburg positions.
- **Configurable tabletop options**
  Available with three tabletop configurations to suit a wide range of surgical procedures: flat top; surgical top with single drain outlet; or curved top with two drain outlets.
- **Secure patient restraint**
  A dual restraint system incorporating side restraint bars provides reliable patient positioning throughout the procedure.
- **Effortless mobility**
  Four retractable wheels allow the table to be moved smoothly and easily when required, while maintaining a stable working platform during procedures.
- **Premium integrated design**
  Constructed from durable 304L stainless steel for excellent hygiene, longevity and ease of cleaning. An optional integrated power outlet can be positioned beneath the pyramidal base for convenient access to electrical equipment.

TA701 Electric – Heated top – Lateral Tilt

TA701.115

TA701 Surgical Table with Heated Top & Lateral Tilt

Designed for demanding veterinary surgical environments, the TA701 combines a whisper-quiet stainless steel construction with advanced fully electric, three-dimensional positioning. Engineered to maximise surgical precision, practitioner ergonomics and patient comfort, it provides effortless control over every aspect of the operating position.

Independent foot controls allow smooth, precise adjustment of table height, Trendelenburg positioning and lateral tilt, giving the veterinary team complete freedom to optimise access to the surgical field while maintaining a comfortable working posture and reducing unnecessary physical strain.

The TA701 also incorporates an integrated heated surgical tabletop, helping to minimise the risk of perioperative hypothermia. An integrated temperature probe and intuitive LCD display provide accurate, real-time monitoring and adjustment, maintaining a consistent patient temperature throughout the procedure.

Three-Dimensional Electric Positioning
Fully electric, foot-operated adjustment of table height, longitudinal tilt and lateral tilt provides precise positioning with minimal manual handling.

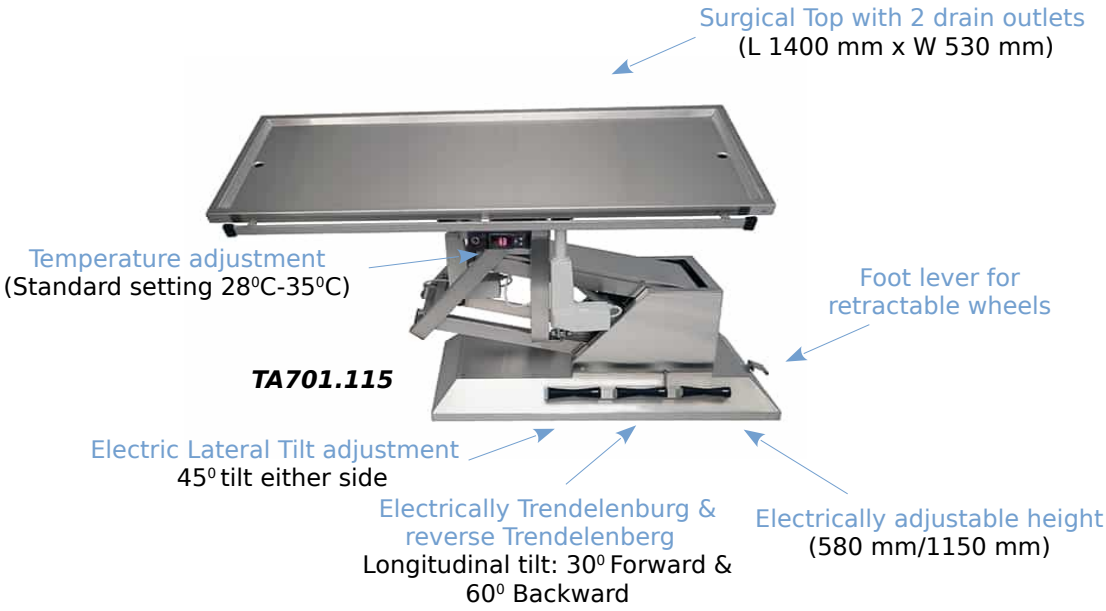

Intelligent Thermal Regulation
The heated tabletop features an integrated temperature probe and LCD display for intuitive, real-time temperature monitoring and adjustment.
Maximum temperature: 35°C

Configurable Surgical Workspace
The generous stainless steel tabletop is available in flat, single-drain or dual-drain configurations, allowing the table to be specified to suit different surgical disciplines and clinical requirements.

Mobility & Ergonomic Design
A retractable four-wheel system enables effortless repositioning when required, while helping to minimise lifting, pushing and operator strain.

VETINOX EQUIPEMENT VETERINAIRE

TA703 Electric – Radiology Top

TA703.115

TA703 Surgical Table with Radiology Top & Lateral Tilt

Maximise clinical efficiency and enhance patient safety with the TA703 Surgical Table, combining advanced positioning technology with integrated radiographic capability.

Designed to support both surgical and imaging procedures on a single work surface, the TA703 helps eliminate unnecessary patient transfers while streamlining clinical workflows.

At its core is a whisper-quiet, fully electric three-dimensional positioning system, providing precise and effortless control throughout every procedure. Independent foot controls allow practitioners to adjust table height, Trendelenburg and Reverse Trendelenburg positioning, and lateral tilt with ease.

Smooth, progressive movements minimise patient disturbance while supporting an ergonomic working position for the clinical team.

Integrated Radiography Capability
The dedicated radiography tabletop features a 16 mm blue polymer surface, enabling diagnostic imaging to be performed directly on the table without repositioning the patient. For practices requiring greater flexibility, the TA703 is also available with standard tabletop configurations, including flat, single-drain and dual-drain options.

Three-Dimensional Electric Positioning
Independent foot controls provide precise adjustment of:

- Table height
- Trendelenburg and Reverse Trendelenburg positioning
- Lateral tilt

Combining advanced ergonomics, seamless positioning and integrated imaging capability, the TA703 is designed to provide a highly versatile solution for modern veterinary surgical and diagnostic environments.

TA710.110 ELITE

TA710.110

ELITE Electric Surgical Table

Designed for the demands of advanced veterinary surgery, the ELITE Electric Surgical Table combines exceptional ergonomics, precision positioning and effortless clinical control. Its whisper-quiet stainless steel construction provides a calm, professional working environment, while fully electric three-dimensional positioning enables precise adjustment of table height, Trendelenburg and reverse Trendelenburg, and lateral tilt.

The result is outstanding flexibility in patient positioning, providing practitioners with optimal access to the surgical field throughout even the most demanding procedures.

The V-shaped tabletop offers excellent patient support and stability, with independently adjustable side panels that can be manually positioned and securely locked to accommodate a wide range of procedures and patient sizes.

For added practicality, the table features four retractable wheels for smooth, effortless repositioning when required and is supplied as standard with a stainless steel I.V. holder.

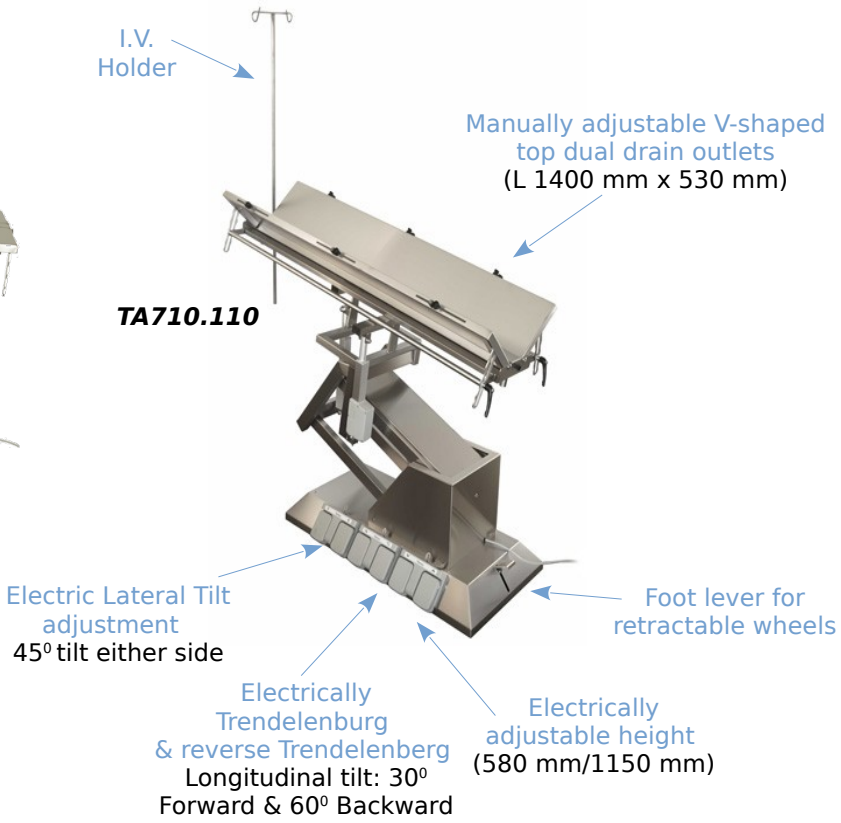

Key Features

- Adjustable V-Shaped Tabletop: Independently adjustable and manually lockable side panels provide secure, adaptable patient support and positioning.
- Fully Electric Height & Longitudinal Tilt: Precise electric adjustment of table height and Trendelenburg / reverse Trendelenburg positioning via independent controls.
- Electric Lateral Tilt: Smooth, controlled lateral positioning provides enhanced access to the surgical field and supports advanced surgical techniques.
- Whisper-Quiet Stainless Steel Construction: Robust 304L stainless steel construction combined with exceptionally quiet operation for a refined clinical environment.
- Integrated Mobility: Four retractable wheels allow the table to be moved easily when required, while maintaining a stable footprint during procedures.
- Stainless Steel I.V. Holder: Supplied as standard for convenient and secure I.V. fluid management.

VETINOX EQUIPEMENT VETERINAIRE Dentistry Solutions

VETINOX offers a specialist range of veterinary dental equipment, combining premium construction with intelligent modularity to support the evolving demands of modern oral healthcare.

Innovative modularity: Transform your consultation or surgical workspace into a fully equipped, high-performance dental environment in moments. Designed for flexibility and efficiency, the modular system adapts seamlessly to a wide range of dental procedures and clinical requirements.

TUB TABLES

TA170.030

Ergonomic Excellence for Scaling & Extended Procedures

Available in 9 standard models, the tub tables are designed to maximise practitioner comfort:

- **Ergonomic recess:** Allows close access to the patient without restricting legroom.
- **Ideal seated position:** Reduces back strain during precision procedures.
- **Stainless steel construction:** Exceptional hygiene and long-term durability.

EXAMINATION TABLES

TA301.000

Instant agility & modularity

The examination tables (e.g. TA301) combine durability with rapid conversion:

- **Rounded dental trays:** Compatible with the examination tables for optimal fluid management.
- **Anti-vibration stability:** Robust structure ensures maximum precision when using burs and ultrasonic scalers.
- **Enhanced hygiene:** Easy-to-clean surfaces for efficient turnaround between patients.

SURGICAL TABLES

TA710.110

Total visibility

Access to the oral cavity is one of the key challenges in advanced dental surgery:

- **3rd dimension Technology:** Electric Trendelenburg / Reverse Trendelenburg positioning for optimal viewing angles.
- **V-Shaped top:** Secure patient support throughout the procedure.
- **Quick conversion:** Compatible with dental tops in just seconds.

Radiology Solutions

VETINOX develops and manufactures specialist equipment designed to meet the exacting demands of modern veterinary radiology. Its range of modular, scalable tables provides flexible solutions for a wide variety of diagnostic and clinical applications, supporting efficient workflows and precise patient positioning.

Optimised for clinical versatility, **VETINOX** systems allow examination and surgical areas to be quickly transformed into high-performance imaging and treatment environments. Designed to adapt as clinical requirements evolve, they provide a practical, ergonomic foundation for modern veterinary imaging and patient care.

Radiology Examination Table with Radiolucent Top

TA300.051

Optimise your workspace without compromising performance

- **Design:** Compact structure with excellent maneuverability.
- **Stability:** Equipped with four Ø100 mm castors with reinforced locking system for secure positioning during examinations.
- **Performance**: Double-access radiolucent tabletop specifically designed for smooth, safe, and ergonomic patient handling.
- **Tabletop dimensions:** 1250 mm x 600 mm

ELITE Mobile Examination Stretcher Table with Radiolucent Top

TA100.415

A versatile mobile solution for indoor and outdoor use

- **Ergonomics:** Ultra-low loading height (225 mm) for easier positioning of large animals while reducing operator strain.
- **Autonomy:** Integrated battery-powered operation provides complete freedom of movement without floor cables.
- **Convenience:** Supplied with an intuitive wired hand control for quick and easy adjustment.
- **Tabletop dimensions:** 1300 mm x 600 mm

Radiology Solutions

VETINOX EQUIPEMENT VETERINAIRE

Electric Surgical Table with Radiolucent Top

TA703.000

A robust and high-performance solution for demanding procedures

- **Modularity:** smooth electric Trendelenburg and reverse Trendelenburg adjustment to suit every surgical procedure.
- **Working comfort:** large flat radiolucent tabletop (1400×530 mm) providing excellent patient support and stability.
- **Versatility:** available in 6 configurable versions, including models equipped with retractable wheels.

Electric Surgical Table with Radiolucent Top & Lateral Tilt

TA703.105

Advanced technology for surgery and imaging

- **Modularity:** precise electric Trendelenburg and reverse Trendelenburg positioning.
- **Ergonomics:** motorised electric lateral tilt for optimal patient positioning and enhanced practitioner comfort.

- **Tabletop dimensions:** 1400 x 530 mm

SMALL ANIMAL TABLES

VETINOX EQUIPEMENT VETERINAIRE Small Animal Tables • Model TA300 & TA900

Supporting the Future of Veterinary Care

Committed to advancing veterinary care for companion animals and exotic species, VETINOX designs and manufactures premium examination and surgical tables engineered for exceptional strength, reliability and long-term performance.

Combining high-grade stainless steel construction with outstanding hygiene and practitioner-focused ergonomics, VETINOX equipment is designed to meet the exacting demands of modern veterinary practice — from routine consultations to advanced surgical procedures.

- **Exceptional Strength & Durability:** Premium stainless steel construction engineered for intensive daily use, delivering lasting performance and excellent long-term investment value.
- **Ergonomics & Hygiene:** Thoughtfully engineered structures promote comfortable working positions while supporting efficient cleaning and stringent infection-control protocols.
- **Exotic Pet Expertise:** Specialist solutions designed to facilitate the safe, secure and considerate handling of small animals and exotic species.
- **A Complete Clinical Range:** A comprehensive portfolio of examination and surgical tables designed to support every stage of patient care, from consultation and diagnosis through to treatment and surgery.

TA900.000
Wall-mounted surgical table for exotic & small animals.
Fully foldable table with manual height adjustment via a wall mounted rack system for optimal ergonomic positioning

TA900.100	Small animal flat-top stainless-steel surgery table (L 1000 x W 460 mm - H from 750 to 1200 mm)
TA900.200	Small animal surgery table one drain outlet (L 1000 x W 460mm - H from 750 to 1200 mm)

TABLE ACCESSORIES

VETINOX EQUIPEMENT VETERINAIRE

Table Accessories

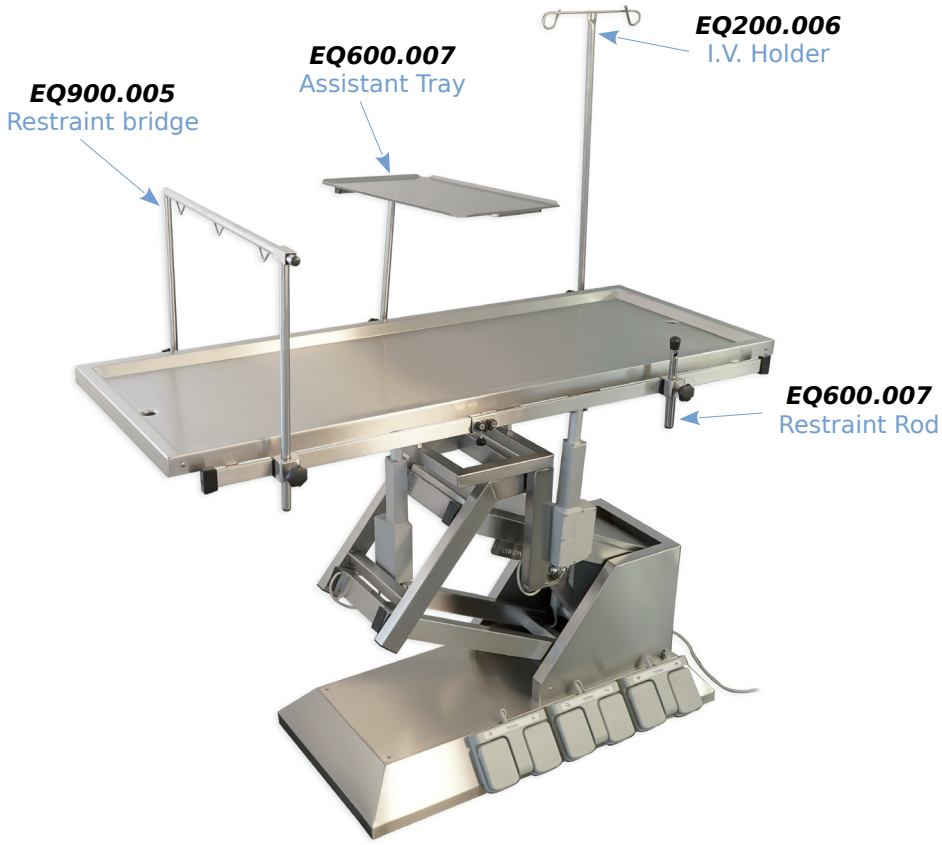

Modular Accessories for a Tailored Veterinary Practice

From routine consultations to advanced surgical procedures, VETINOX modular accessories enable you to configure your veterinary table to meet the demands of every clinical application.

Designed to enhance ergonomics, hygiene, patient comfort and safety, the VETINOX accessory range provides practical solutions for secure restraint, optimal patient positioning and greater tabletop versatility. Build a configuration that works for your practice, your procedures and your patients.

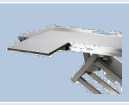

- **Complete Modularity:** Easily add, remove or reposition accessories to adapt your table to the procedure in hand, allowing your equipment to evolve alongside your clinical requirements.
- **VETINOX Quality:** Manufactured from the same premium-grade stainless steel as our veterinary tables, VETINOX accessories deliver exceptional durability, corrosion resistance and ease of disinfection.
- **Enhanced Ergonomics & Patient Comfort:** Table extensions and positioning accessories support a more comfortable and efficient working posture, while dedicated mats provide additional support and comfort for patients during examination, treatment and recovery.
- **Confident Patient Restraint**: Purpose-designed fixing and restraint systems provide secure, reliable support for patients of all sizes, helping practitioners maintain safe and stable positioning throughout procedures.

Configuration example: Surgical table equipped with a restraint bridge, an assistant tray an I.V. holder and a restraint rod.

TERMS AND CONDITIONS

1. All prices are quoted for Shor-Line product ex-works Cowbridge, exclusive of VAT.
2. Payment of account is due (14) days from the date of invoice.
3. Late payment of account will attract a surcharge, equivalent to 2% per month from the date that the invoice is due, (e.g., 14 days from the date of invoice).
4. All products remain the property of Shor-Line Ltd until paid for in full.

PRODUCT WARRANTIES:

All Shor-Line stainless steel products are warranted against manufacturer defects in materials and/or workmanship, whilst they are the property of the original purchaser - assuming proper care and maintenance has been carried out.
All mechanical parts and/or electrical devices carry a one year warranty, unless specifically extended or limited in the product
description, product inserts or operation manuals.
Some United States warranties, as stated in the operation manuals do not apply outside the United States. These are superseded by European warranties - please check for details.

GUARANTEE OF SATISFACTION:

If a customer is not fully satisfied with the quality of workmanship of a Shor-Line product, Shor-Line must be notified in writing
within (10) days of receipt of goods.
Notification should be mailed to:

Customer Services Department
Shor-Line Limited
Unit 36
Vale Business Park
Llandow
Cowbridge
Vale of Glamorgan
CF71 7PF
United Kingdom
Telephone: +44 (0) 1446 77 20 41
Website: www.shor-line.co.uk
E-mail: info@shor-line.co.uk

Proof and date of purchase will be required for your request to be carried out quickly and efficiently.

CUSTOMERS' RECEIPT OF GOODS

Customers are advised to check that the number of packages corresponds with the quantity stated on the "Carrier's Note".
Any discrepancy should be recorded on the note.
Any damages or shortages must be advised to "Shor-Line Limited" within (2) days, and confirmed in writing within (7) days.
No other claim will be considered.
Please note that the claim procedures that are stated on the exterior of the packing material only apply to the United States
market.

PRODUCT RETURN AUTHORISATION:

Customers who need to return products must first obtain authorisation from "Shor-Line Customer Services" on 01446 772041.
Products may be returned for the following reasons:

1. The product is received in a damaged or sub-standard condition.
2. The product requires "service" or "repair"

To assist in the return authorisation please provide the following information:

a. The name of the product to be returned and the product code number.
b. The product serial number
c. The reason for return
d. The date of purchase and the Shor-Line Invoice Number

Shor-Line's Customer Service Department will allocate an Authorisation Number, which will ensure that the repair, replacement and/or credit will be handled quickly and efficiently. Returns will be subject to a 10% re-stock fee.
